Join Our Team as a Social Media Editor!

EJSO has seen a huge growth in its reputation and presence within the research community. We are looking at how we can continue to engage with our current readers and expand globally to reach other researchers out there. We currently have one social media platforms where we promote our journal - LinkedIn. We are looking for someone to join a small team of social media editors to help continue this work. We are hoping for some creative minds to join forces and help share our journal activities and promote our important research through different means of media.

What You'll Do:

- Become part of the EJSO Editorial Board.
- Partner with the Co-Editors, Associate Editors, Editorial Board, and Publisher to craft and execute a dynamic author engagement and social media strategy.
- Take the lead on a rotational basis, and coordinate creating, selecting, and posting captivating content. We envision posts, images, videos, podcasts, author interviews, and more!
- Manage day-to-day social media activities to build and maintain a strong, vibrant presence for the Journal across all platforms.
- Carefully curate content to ensure its engaging, accurate, and free from any libellous, unlawful, or harmful material—maintaining the journal's standards.

Who You Are:

- A social media strategist and editor with a keen eye for detail and a passion for science communication.
- A natural leader who loves coordinating teams and bringing creative ideas to life.
- Someone who understands the importance of ethical content selection and upholds the highest standards.
- Enthusiastic about connecting authors, readers, and the wider community through innovative social media storytelling.

Why Join Us?

- Be at the forefront of research dissemination and community building.
- Collaborate with industry leaders and passionate experts.
- Shape the voice and reach of a respected scientific journal.
- Enjoy a role that's as dynamic and exciting as the content you'll create!

If you are interested in this role, please contact Dawn Aggett, d.aggett@elsevier.com with a short cover letter explaining why you would be interested in the role and possible ideas you may have for journal to explore.

Deadline for applications: 30th November, 2026.
